

## **Bone Marrow Transplant Unit:**

Department of Medical Oncology and Paediatric Oncology of Mahavir Cancer Sansthan caters a substantial number of cancer patients, like leukemia, lymphoma, multiple myeloma, etc. These patients, after initial treatment by chemotherapy, many of them respond to treatment, and such cases need bone marrow replacement for long treatment cure. Mahavir Cancer Sansthan is planning to establish this facility. Fortunately, Government of Bihar extended financial help to Mahavir Cancer Sansthan to establish this facility and culminating into a full-fledged most modern bone marrow transplant unit established and the same was inaugurated on 27th July by his Excellency, Governor of Bihar. Since its commissioning, we have been able to have autologous transplant of 5 cases of bone marrow multiple myeloma performed. The procedure was very successful. Besides, Government also provides financial help to such patients towards bone marrow transplant procedure.
